

# Integration Note

Manufacturer:	SIRIUS
Model Number(s):	SCH1P1, SCH2P
Core Module Versions:	4.0 build 1510 or later
Comments:	
Document Revision Date:	1/29/2013

## OVERVIEW AND SUPPORTED FEATURES

The SCH1P1 and SCH2P are SIRIUS tuners. The tuners includes an RS-232 connection which is used to connect to the **g!** system and provide communications, enabling reliable two-way control.

### THE TUNER SUPPORTS THE FOLLOWING FEATURES:

**Basic Tuning Control:** Arbitrary station selection.

**Built-In g! Interface:** The built-in **g!** SIRIUS tuner interface is automatically enabled.

**Important!** The three-Position switch on the back of the SCH2P must be in position "1" to enable RS-232 control.

### THE TUNER DOES NOT SUPPORT THE FOLLOWING FEATURES:

Any feature not specifically noted as supported should be assumed to be unsupported.

## INSTALLATION OVERVIEW

1. During the rough-in phase install the necessary power and A/V cabling for the tuner.
2. Also during the rough-in phase, run a Cat5 wire from the location of the tuner back to the Network Assembly of the **g!** system to provide the serial connection needed to control the tuner. Refer to the **RS-232 Connection Options** Integration Note for other serial connection options.
3. Install the tuner and other home audio or theater components.
4. Test the tuner with the audio / video equipment to ensure that the stations tune and play correctly.
5. Connect the **g!** system to the tuner electrically. See the connection diagram for more information.
6. Configure the **g!** system for the tuner and confirm communication between the tuner and the **g!** system controller.
7. Test the system by changing stations from the Viewer interface.

## BILL OF MATERIALS

#	Device	Manufacturer	Part Number	Protocol	Connector Type	Notes
1	DB9M to RJ45 Adapter	ELAN	HA-CB-307	RS-232	DB-9 Male X RJ-45 Female	
2	Cat5 Cable Assy.	Installer	N/A	RS-232	RJ-45 Male X RJ-45 Male	Must terminate all 8 conductors
3	g! System Controller	ELAN	Various (e.g. HC 12)	RS-232	RJ-45	

## g! CONFIGURATION DETAILS

The following table provides settings used in the **g!** Configurator. Please refer to the **g! Configurator Reference Guide** for more details.

- “<Select>”                                      Select the appropriate item from the list (or drop-down) in the Configurator.
- “<User Defined>”, etc.                      Type in the desired name for the item.

Devices	Variable Name	Setting	Comments
Communication Devices	Name	<User Defined> (Default: <b>Tuner</b> )	
	Type	<b>Serial Port</b>	
	Communication Type	<b>Standard Connection</b>	
	Location	<User Defined> (Not Required)	
	COM Port	<Select>	
Audio Tuners	Name	<User Defined> (Default: <b>Sirius SCH2P Tuner</b> )	
	Device Type	<b>Sirius SCH2P Tuner</b>	
	Location	<User Defined> (Not Required)	
	COM Device	<Select> (Default: <b>Sirius SCH2P Tuner</b> )	
	Tuner ID	<Select> (Default: 0)	See Note #1

### Notes:

1. Tuner ID must match the Module ID of the tuner. Factory default is "0", there should be no need to change.

## COMMON MISTAKES

1. Not setting the switch on the back side of the Tuner to Position “1” will prevent the **g!** System from communicating with the Tuner.
2. If the tuner is not receiving a signal from Sirius, it will not come out of “Standby” mode and thus will not be controllable in the **g!** interface. Ensure that the “sat” or “ter” LEDs are lit before attempting to connect the unit to your system
3. The AC power adapter for the SCH1P1 **MUST** be connected to the power connection on the DIN plug. Connecting it directly to the unit will not work.
