Stratus Release Notes

Build 1.01

September 12, 2019

Contents

Stratus 1.01 Overview

The 1.01 software release includes:

- **Alert Threshold**
  - Refine in-app and email alert frequency by customizing threshold on a per-component basis. Reduce alerts for oscillating devices.
  - Select from 0 (no threshold), +3, +5, +10, +15 minutes
- **Address Lookup Function**
  - "Search Address…" field added to applicable areas of application to suggest addresses to speed entry and accuracy.
- **Note Categories**
  - Note Categories can be defined by Admins and accessed by employees in the Location Notes section of each location to help classify work performed. This will help standardize entries for forthcoming reporting functions.
- **Dozens of Fixes and Enhancements**
  - See "CER Fixes" section of this document

Status System Requirements

- Stratus Application
  - PC running Windows Windows 10
  - 128MB RAM
  - 1GB free disk space (complete library download)
- ELAN Core software 8.3.11 or later is required for controllers added as locations in Management Cloud.

CER Fixes in 1.01

- **CC001-946**   Add Location: User unable to add any location if any group is not associated with it
- **CC001-686**   Client Contacts table which is now sortable by column does not have default sort selected and no indication table is sortable
- **CC001-423**   Location Settings: Select different contact would not update with appropriate address in Client Info area
- **CC001-2033**   Navigation from search is not working
- **CC001-2029**   Profile > View My Groups> Group name text overlap with the location name.
- **CC001-2015**   In-app navigation not working when clicking on alert
- **CC001-1895**   Connected Devices should not have Alert Modes enabled by Default
- **CC001-1870**   Save Controller display limit of 10 controllers
- **CC001-1570**   Cannot Delete location if Controller or Stratus User on Controller not available
- **CC001-1548**   Communication Status Table layout issues
- **CC001-1522**   Client Contact: Getting error "Precondition failed" when we try to delete primary contact
- **CC001-1510**   Delete Last note remove the note from list but leave note contents on screen
- **CC001-1503**   Changing Contact in Locations settings passes when you update but does not save the change and reverts back to original contact
- **CC001-1501**   Deleting Client Contacts that is used in a location as a Primary Contact fails with error "Pre-condition failed"
- **CC001-1498**   View group: Alignment issue on view group page
- **CC001-1490**   Create new client: finish button is not getting disabled even mandatory field   "time zone " is not selected
- **CC001-1477**   Center Alert/Notification Counts in circle
- **CC001-1466**   Search panel not closing after selecting a result
- **CC001-1446**   Manage Alerts Screen: Subsystem & device text positioning
- **CC001-1436**   Location Note: Note text is overflowing for large text
- **CC001-1409**   Add Location Client Details page will allow leading spaces in any of the fields but also saves them with the spaces
- **CC001-1261**   Address overflow issues

Known Issues

- **Configure IP** function is not yet available. Please continue to use g!Tools if this function.
- **GVSL License** installation **(Key Manager)** is not yet available in this tool. Please continue to use g!Tools if this function.
- **Profile > Settings**
  - This version supports English only
- **Login Page Refreshes**
  - The login page is refreshing every 20 seconds clearing contents when idle
- **All Locations Tab**
  - Map
    - Location pin currently use latitude and longitude coordinates from the controller. Future release will allow use of the location address specified in Management Cloud
- **Alerts**
  - Devices that exist in multiple subsystems (e.g. ITP, ELAN doorbell) default to sending alerts for each instance of the device. Alerts for these types of devices will be consolidated in future build but in meantime you can adjust alerts as desired per device instance.
- **Notifications**
  - "Mark As Read" is not currently available for Notifications so it's use during the Early Adopters Release will be limited.
  - Updating Profile > Manage Notifications will generate errors.
- **Search**
  - Currently limited to searching across Locations, Controllers, Clients, Documentation and Downloads.
  - Searching for terms that include underscore "_" currently yields spotty results.
- **Help & Support**
  - FAQs and Knowledgebase tab currently using static content. Future release will dynamically-driven content.
- **System Logs**
  - There is no date/time selector in System Logs section of Management Cloud so initial access will only show current logs presented by the controller

ELAN's Dealer website is your one-stop source for information about ELAN products. From this site, you can access software downloads and documentation, hardware documentation, a dealer forum, and links to training and sales support.

Appendix 1: History of Feature Additions By Version

The 1.0 software release included:

- **Features:**
  - **User Management**
    - Create Users & Groups
    - Assign Roles & Permissions
    - Client Management
    - Create Clients
    - Create Client Contacts
    - Location Management
    - Add Location
    - Import controller details in seconds
    - Auto-configure alerts
    - Watchlist
    - Notes & Descriptions
  - **Rename Controllers**
    - Rename Controller w/o having to contact Tech Support
  - **Alerts**
    - Component-level alerts from Controller
    - Several Subscribe/Unsubscribe options
    - In-App and Email subscription management
    - Location Mute with timer
  - **Quick Connect**
    - Saved List of Controllers w/ passwords
    - Quick Launch Configurator / Viewer
    - Scan for location controllers
    - Add / View Location
  - **Downloads**
    - Instant access to Core Releases, Client installers, Release Notes, Integration Notes
  - **Embedded Support Options**
    - FAQs
    - Integration Notes
    - Video Integration Notes
    - Feedback Form
  - **Advanced Search**
    - Find Locations, clients, docs & downloads
    - Find devices and drivers in customer locations
